## Implementation stages

**7 Days**

Signing the contract and  
collecting documents on  
the partner's side.

**14 Days**

API solutions  
integration or our  
software  
installations

**7 Days**

testing and  
launching

## HOW WE MAKE CALCULATIONS

Following the results of the operational banking day, KWIKPAY sends clearing reports to participants and partners, which reflect all transactions that took place during the business day and the overall result of clearing.

The participants of the system open correspondent accounts in the settlement bank of the KWIKPAY payment system. Settlements take place through the settlement bank with the participants of the system.

Settlements with partners are carried out through participants.

Payments are made in the currencies defined by the agreement.
